

# RIVERVIEW ELEMENTARY SCHOOL

## THREE PARKS

The Riverview site is a park-like setting; what if this was a community school in the park?

- There are 3 types of parks: 1) a natural/open area park, 2) an active/playground park, 3) a social gathering place/picnic park
- This design sets the school in a park-like site; the building defines and connects these parks.

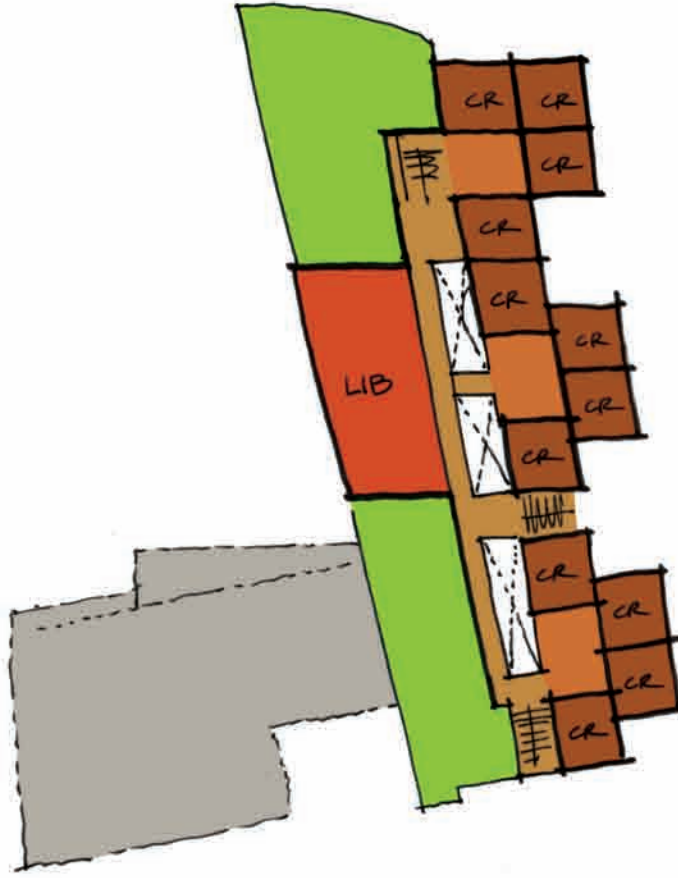

- The building opens to the community, with the administration and social gathering park in front.
- The library is centrally located for the classrooms on the second floor to take advantage of views of the Olympic Mountains.
- The gathering park at the front of the school can be an entry plaza, an exterior learning area and an informal play space.
- Classrooms are along the east side of the site, with views looking over the wetlands area.
- The gym and play area are grouped at the south side of the site.
